showcase: central

Showcase Central is an online marketing and networking system dedicated to building opportunities

For Your Cause or Charity

Discover a New Way to Convey Your Message

Charity Showcase

As part of our outreach program, Showcase Central offers all registered charities an opportunity to create a showcase free of charge. A charity showcase enables you to present your message, promote events, and helps to reach across borders and other physical barriers to wide range of organizations, businesses, and individuals.

A showcase is built around a easy to navigate template that includes areas for logos, text, pictures and video. Specific charity information, related links, and contact data are presented in an easy to understand information box. Appealing graphics, creative text and powerful multimedia components are all available to help you promote your message.

All information can be edited and published using a regular Internet browser at any time, giving you immediate control over the content of your showcase.

All showcases support multiple languages. Please contact us in case your language is choice is not featured, and we will make every effort to add it as soon as possible.

Getting started is easy! Please feel free to join Showcase Central at www.showcase-central.com and register a charity showcase. Once you have become a member (free), choose "create a showcase" from the buttons along the top. Choose "Charity" as your Showcase Type and then the "next" button to choose your features and to take advantage of the many opportunities to promote your cause or charity.

Please note that the showcase will not be put into production until your charity registration information is confirmed. Thank you for your understanding.
